SUMMARY

4th year data-driven engineering student with practical experience in building data pipelines, statistical analysis, and developing machine learning models in Python and SQL. Equipped with strong proficiency in ETL and relational database design, reinforced by an international academic background, I aim to leverage these skills to drive strategic decision-making through data analysis, automation, and data visualization.

SKILLS

Hard Skills: Python (Pandas, NumPy, Scikit-learn, PyTorch), SQL, ETL & Databases, Machine & Deep Learning, C, Java, HTML/CSS/JS, Agile methodology

Tools: Azure, Git/GitHub, Linux, Excel, Streamlit, Django

Soft Skills: Organization, Rigor, Communication, Autonomy, Team spirit

EDUCATION

EFREI Paris – Panthéon-Assas University Aug 2023 – Sept 2028 (Expected)
Master's Degree in Data Engineering Paris, France

- Relevant Coursework: Mathematics for Machine Learning, Data Analysis, Databases, Algorithms & Data Structures

Southeast University (SEU) Sep 2025 – Dec 2025
Exchange Semester – Top 17 globally in CS & Engineering (ARWU) Nanjing, China

French International School of Hong Kong Sep 2011 – Jun 2023
High School Diploma (Baccalauréat), High Honors (Mathematics, Physics & Chemistry) Hong Kong

TECHNICAL PROJECTS

Virtual Radiologist Assistant (MedGemma) Python, PyTorch, Streamlit

- Developed a web application (Streamlit) integrating an LLM for automated analysis, diagnostic assistance, and medical image classification of chest X-rays

Cybersecurity Analysis Pipeline (ANSSI) Python, Scikit-learn, Django

- Collected, cleaned, and centralized CERT-FR (ANSSI) security bulletins and CVE data using NVD and FIRST APIs
- Deployed machine learning models (Random Forest, KMeans, Isolation Forest) to triage and classify critical vulnerabilities
- Automated email alerts and designed interactive data visualizations within a Django dashboard

Deep Learning Model Implementation Python, NumPy, PyTorch

- Developed neural networks (MLP, CNN) from scratch for image classification (MNIST, CIFAR-10)
- Trained a CNN for breast cancer detection (CBIS-DDSM), incorporating data augmentation and class imbalance handling to minimize false negatives

Hiking Recommendation Database SQL, MySQL

- Designed a normalized relational database (ERD/Relational Schema), with optimized SQL queries and stored procedures feeding a personalized recommendation engine

PROFESSIONAL EXPERIENCE

Sales & Operations Intern Jan 2025 – Feb 2025
Darty Paris, France

- Merchandising for sales
- Customer advice
- Sales and product optimization

Inventory Management & Quality Control Intern Jun 2024 – Jul 2024
U Express Le Havre, France

- Stocking shelves, receiving goods
- Product rotation, checking expiration dates
- Facing, managing the attractiveness of the supermarket aisle

LANGUAGES & INTERESTS

Languages: French (Native) | English (Fluent / C1) | Spanish (Intermediate / B2)

Interests: Badminton (3 years) | Tennis (5 years)
